THE MANUFACTURING PROCESS

The Machinery

Using new state of the art machinery at our 10,000 square foot factory in High Wycombe, our talented craftsmen are able to create stunning bespoke furniture for any design project.

Carpentry

Our talented carpenters use state of the art machinery and quality hardwood to create solid frames to last. Each piece of furniture requires its own unique combination of material, using a variety of woods including the right choice of oak, walnut, beech, veneer, MDF or plywood.

Foam, Bodywork, Fabric Cutting & Sewing

Each element is important in ensuring the comfort and aesthetic of the furniture. From the right density foam and the perfect mould, to knowing exactly where to cut the fabric ensuring patterns match and the least amount of fabric waste, to finally sewing it all together in perfect harmony with the design of the individual piece.

Upholstery & Final Touches

Finally, the upholster seamlessly dress the furniture, adding details like studding, deep or pulled buttoning, fluting, piping or intricate pleating. At Circus 25 we always go through thorough quality control before any piece of furniture leaves the factory, ensuring the highest quality of furniture for the end client.
